

## **WHAT IS VERTIGO?**

Meniere's disease. This is an inner ear disorder thought to be caused by a buildup of fluid and changing pressure in the ear. It can cause episodes of vertigo along with ringing in the ears (tinnitus) and hearing loss. Vestibular neuritis or labyrinthitis.

## **CAUSES OF VERTIGO DISORDERS**

Vertigo is commonly caused by a problem with the way balance works in the inner ear, although it can also be caused by problems in certain parts of the brain. Causes of vertigo may include: benign paroxysmal positional vertigo (BPPV) – where certain head movements trigger vertigo migraines – severe headaches.

## **SYMPTOMS OF VERTIGO DISORDERS**

- Feeling nauseated.
- Vomiting.
- Abnormal or jerking eye movements (nystagmus)
- Headache.
- Sweating.
- Ringing in the ears or hearing loss.

## **NEUROTHERAPY TREATMENT**

### **First treatment**

If vertigo is due to cervical spondylosis, then give the following treatment:-

- (5) Pan
- (3) Gal
- (5) Mu<sup>0</sup>
- (3) Acid
- (6) Adr
- Neck Ghisai'

### **Second treatment**

- (4) Pit (SHAAAANT' )
